DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hong (U.S. 6,550,730).

Hong teaches a metal component (31) that receives a rod (1). Element 321 is the stopper piece with recess. The instant invention claims a resin component instead of a metal one, with a stopper piece. It would have been obvious to one of ordinary skill in the art to substitute an engineering resin for the metal of the component of Hong depending on cost and availability of materials.
